

Side-event – French Water Partnership

IMAGINING A +4°C WORLD: WHAT ABOUT WATER?

French Pavilion, Thursday 6 December 2018, 10:00-11:30
(Bilingual French-English)

On the occasion of the launch of the video “Imagining a +4°C world: what about water?” (<https://www.youtube.com/watch?v=ubRlxfypO44>), this event will present the impacts an average warming of +4°C in 2100 could have on water resources as well as the socio-economic and geopolitical consequences it could entail.

Beyond global trends, different case studies will be presented to highlight local issues and adaptation solutions.
